National Institutes of Health

Tribal Health Research Office (THRO) at National Institutes of Health

Established in 2015, the Tribal Health Research Office is located in the Division of Program Coordination, Planning, and Strategic Initiatives in the Office of the Director (OD), NIH. While not TCU specific, Dave would be a good person to reach out as he also worked at IHS and is very tied into all the Native serving programs at NIH and IHS. David R. Wilson, Ph.D.,
Director

Center for Disease Control

The Tribal Support Unit, housed within CDC's Office for State, Tribal, Local and Territorial Support (OSTLTS), is the primary link between CDC, the Agency for Toxic Substance and Disease Registry (ATSDR), and tribal governments. CDC's Tribal Support Unit focuses on activities that reflect the agency's role in helping to ensure that American Indian/Alaska Native (AI/AN) communities receive public health services that keep them safe and healthy.

CDC/ATSDR policy requires that all agency programs consult with tribal governments when they develop programs and activities that will affect Native populations. CDC is committed to working with federally recognized tribal governments on a government-to-government basis, and strongly supports and respects tribal sovereignty and self-determination for tribal governments in the United States.

Natural Resources Conservation Service

The Natural Resources Conservation Service (NRCS) provides conservation programs and technical services to American Indians, Alaska Natives and Tribal governments. This is done through 45 full-time and 30 part-time field offices on Indian lands and through numerous other field offices located off of Indian lands. Working with the Intertribal Agricultural Council (IAC) and Indian Nations Conservation Alliance (INCA) NRCS has assisted with the establishment of 33 Tribal Conservation Districts.
